# Stock Market Activities

— — —

Buying - buying stock

Selling - selling stock

Short selling

- When you short a stock, you are essentially borrowing it from someone else, and after time, if it goes down in value, you will have to pay back less than what you borrowed, and thus make a profit

Options trading

- You purchase a contract for a number of stocks and you have to sell it back on a date you select
- Call = when you anticipate price increase
- Put = when you anticipate price decrease
